Professional Experience

Android Developer / Access Code Fellowship – NYC, New York
March 2015 to present

Access Code produces high quality Android developers through a 9-month curriculum developed and taught by leading Android experts from companies such as Google, TouchLab, and Adobe. Accepting only 5% of applicants, the highly selective program prepares graduates with both comprehensive technical training in Android as well as an immersive entrepreneurial and product oriented learning.

Android Developer / Your Final Project Name – NYC, New York
September 2015

Describe your role on the team and the purpose of the project. Ex: Led database architecture, querying, and communication on a team of # developers to design and develop AppName. AppName is an innovative app that allows users to *describe core functionality*, with over ## downloads on Google Play (only if this is an impressive number). ++ links to app on play.

Android Developer / Your Hackathon Project Name – NYC, New York
August 2015

Describe your role on the team and the purpose of the project. Ex: Worked on a team of three developers to design and build a social service focused app in a 48-hour Hackathon hosted in conjunction with the Robin Hood Foundation. *YourAppName* helps underserved and underrepresented communities access social services *or what the app does*. Utilizing *APIs or tools you used* and the Aunt Bertha API, *your app function*. Products were evaluated by an elite panel of judges including Stephanie Hannon, CTO for Hillary Clinton, and Brian Cohen, Chairman of NYAngels. ++ links

Previous Professional Role / Organization – City, State
StartDate to EndDate

Only list relevant or interesting professional experiences. You should highlight any duties in these roles that directly relate or aid you in your current job search. Aim to start your description with a verb (Led, Managed, Developed) and quantify your work or success (Raised $1mm in funding and increased donor return 2x).

Education

Institution Name / Degree, Program
You may list your GPA, but should only do so if you received 3.5 or above.

Skills

Java • Git • Android • Node.js • Programming Languages • Tools (Parse, Mongo, Firebase, API's, etc) • In order of dominance • Actual spoken/written languages • Design Tools • No Microsoft office
